You begin with a small tribe and the will to build a great civilization. Expand your farms and mines to gain the resources to build your cities. This lays the groundwork for technological advancements, better governments, and great wonders. Choose wise leaders whose legacy will lead your people to greatness. Strengthen your army to protect your borders and to expand your territory. And shape history with your political skill. The classic civilization-building game is now even better. In addition to outstanding new art, this version includes subtle improvements to the existing mechanics – a fairer, less random military system, streamlined corruption mechanics, and rebalanced the cards.
